

I have recently written a book about my own method of technical analysis named "Hemant Kanade Factor"™. The readers have given a warm welcome to the book. I am sure the readers will understand the method well. However, using my method is a matter of practice. The readers should apply the skills they learn through my book to the charts that they observe. I, therefore, decided to give an opportunity to you to have a practice of using "Hemant Kanade Factor"™ under my own guidance. Accordingly, I have already published four books in this series. The books in this series contain exercises in the form of charts. You are expected to observe them very carefully and to detect the buy signals and the sell signals from the charts. The solutions to these exercises are provided at the end of this book. This book has an exclusive emphasis on the intraday charts for the commodities market. I wish you all the best in your efforts to learn and to master the new skill.
